EUROFLEETS TRAINING CALL OPEN

Ship-based Training Course for Technicians and Scientists in
Marine Research 25th - 27th January 2011

A ship-based multibeam training course, organized within the Eurofleets programme, and with instructor from Kongsberg Maritime, will be held in Bergen, Norway on board the Research Vessel G.O. Sars
25th - 27th January 2011.

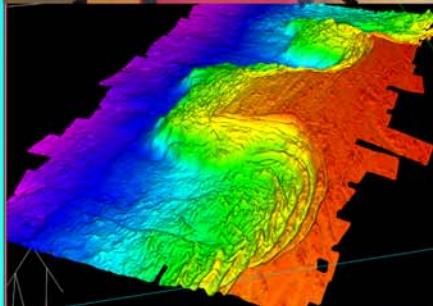

This practical ship-based training course will allow technicians and scientific personnel to acquire the practical skills necessary to operate, collect and refine data from multibeam echo sounders for bottom topography. The course will focus on acoustic theory, principles in multibeam technology, auxiliary instrumentation, software systems, survey design and planning. Practical exercises at sea will be carried out. Training will also cover instruments involved in bottom topography surveys such as navigation systems, attitude sensors, sound velocity sensors etc.

The course and the accommodation on board will be free of charge.

Monday January 24th: arrival of students
January 25th - 27th: course on board RV G.O. Sars
Berths on board are available until Friday 28th

Application forms are available at:
<http://www.eurofleets.eu>
Information about IMR and RV G.O Sars : <http://www.imr.no>

Please note that the course is funded through Eurofleets, Institute of Marine Research and Kongsberg Maritime. Travel expenses must be covered by students.

Applications must be received via e-mail or post by Sunday Nov 28th.
Successful applicants will be notified by Friday Dec 3rd.
