1. Background

The EUROFLEETS “Internet Hub”, launched on January 29th 2010, was developed taking into consideration the principles described in the Deliverable 7.1.1 – Specifications of the EUROFLEETS “Internet Hub”: Structure and Functionalities” which are as follows:

- To be the focal point of information and dissemination of the results/products of the EUROFLEETS project;
- To build up a structure with two main functionalities: dissemination of information with open access, and as a corner stone of the information system of the EUROFLEETS project that will give access to the working area of restricted access to the EUROFLEETS beneficiaries, and to the virtual research fleet platform;
- To be a high quality “Internet Hub” in terms of easiness and velocity of access to information, and in terms of quality of the on-line information;
- Implementation of the “Internet Hub” according to the rules for “accessibility” of the W3C organisation, (institution that sets the world accessibility standards), which allows citizens with some degree of disability to have access to the Information Society technologies;
- Management of the “Internet Hub” based on Google Analytics tool through which we can measure the number of visitors, most visited contents and other indicators, in accordance with the EUROFLEETS Quality Assurance Plan

Hence the EUROFLEETS “Internet Hub”, aiming at being a “one stop shop” for European research vessel information, is composed of a public access website and an administration/editing area to provide easily accessible information taking into consideration all the different plug-in modes, such as the intranet developed by the Coordinator (please refer to Deliverable 0.7 for details regarding the EUROFLEETS Intranet) and the virtual research fleet platform, and the established identity set.

2. EUROFLEETS “Internet Hub” Structure

The public access website is accessible through three domains (URL) easy to identify (<http://www.eurofleets.eu> - main domain; <http://www.eurofleets.org> - which redirects to eurofleets.eu and <http://www.eurofleets.net> - which also redirects to the main domain) that lead the users to the front page (homepage) of the project “Internet Hub” (please see Figure 1 bellow).

On the project “Internet Hub” homepage users have access to the following contents:

- Access to EUROFLEETS Intranet (please see Figure 2 bellow);
- Newsletter registration
- EUROFLEETS and FP7 logos;
- Advertising banner where any information of special interest for EUROFLEETS can be advertised;
- A short introductory text that briefly describes EUROFLEETS for those users who are not familiar with it;
- Navigation menu that provides access to all project relevant information, such as aims and structure of EUROFLEETS, objectives and results of the different work packages, public downloadable deliverables, presentations, posters, newsletters (please see Figure 23bellow);
- A section for the latest EUROFLEETS news headlines, with links to the respective news article;
- Interactive Calendar to display events/deadlines related to RV issues;
- An interactive tool displaying information on EUROFLEETS research vessels and beneficiaries in coordination with EurOcean InfoBases.

Figure 2 – EUROFLEETS “Internet Hub” Intranet

The screenshot shows the Eurofleets Intranet homepage. The top navigation bar includes links for File, Edit, View, Favorites, Tools, and Help, along with a search bar and a Google link. The main header features the Eurofleets logo and a banner image of a ship and a screen showing marine data. The left sidebar has sections for PROJECT PRESENTATION, PERSPECTIVES, PROJECT MANAGEMENT, and NETWORKING ACTIVITY. The main content area displays a welcome message, news items, and a featured call for multidisciplinary marine science ship-based training courses. The right sidebar contains links for QUICKNAV, FLEETS EXPLORER, COMMUNICATION, and USER MENU.

The “internet hub” will be constantly updated with articles (contents), deliverables, presentations, news, events, etc. as new information becomes available and new achievements are reached within the consortium.

3. EUROFLEETS “Internet Hub” relevant items

A relevant item on the public access website of EUROFLEETS “internet hub” is the EUROFLEETS research vessels and additional equipment webpage where the user can see all the available vessels through the project and have access to vessels technical specifications (Please see Figure 4 bellow).
